

Special Requirement Testing:

Test:

Adrenocorticotrophic Hormone
Aldosterone
Arginine Vasopressin
Arsenic
Basic Metabolic Panel
Cadmium
Calcitonin
Carbamazepine
Chromium
Clozapine
Copper
C-Peptide
Cyclosporine
Glucose
Homocysteine
Insulin
Lamotrigine
Lead
Levetiracetam
Lipid Panel
Lipoprotein
Lithium
Mercury
Parathyroid Hormone-Related Peptide
Phenobarbital
Phenytoin
Pyridoxal 5-Phosphate
Riboflavin
Selenium
Tacrolimus
Thallium
Thiamine (B1)
Thyroglobulin Tumor Marker
Thyroperoxidase Antibodies
Valproic Acid
Vancomycin Peak Level
Vancomycin Trough Level
Vitamin A
Vitamin B6
Vitamin E
Vitamin K1
Zinc

Requirement:

Fasting, NO vitamin supplements for 12 hours before the test, Must be drawn between 6:30-10:30am
Must be active for 2 hours before blood draw, blood draw must be between 8-10am
Fasting for 6 hours (includes fluids), no radioactive material
No gadolinium, iodine, or barium-containing contrast in the last 96 hours before blood draw
Fasting for 12 hours
No gadolinium, iodine, or barium-containing contrast in the last 96 hours before blood draw
No Vitamin Supplements (12 hours before test)
To be drawn immediately before next dose of medication
No gadolinium, iodine, or barium-containing contrast in the last 96 hours before blood draw
To be drawn immediately before next dose of medication
No gadolinium, iodine, or barium-containing contrast in the last 96 hours before blood draw
Fasting and NO vitamin supplements for 12 hours before test
To be drawn immediately before next dose of medication
Fasting for 12 hours
Fasting for 12 hours
Fasting and NO vitamin supplements for 12 hours before test
To be drawn immediately before next dose of medication
No gadolinium, iodine, or barium-containing contrast in the last 96 hours before blood draw
To be drawn immediately before next dose of medication
Fasting for 10 hours
Fasting for 12 hours
To be drawn immediately before next dose of medication
No gadolinium, iodine, or barium-containing contrast in the last 96 hours before blood draw
Fasting for 12 hours
To be drawn immediately before next dose of medication
To be drawn immediately before next dose of medication
Fasting for 12 hours, no vitamins for 24 hours
Fasting for 12 hours
No gadolinium, iodine, or barium-containing contrast in the last 96 hours before blood draw
To be drawn immediately before next dose of medication
No gadolinium, iodine, or barium-containing contrast in the last 96 hours before blood draw
Fasting for 12 hours
No Vitamin Supplements (12 hours before test)
No Vitamin Supplements (12 hours before test)
To be drawn immediately before next dose of medication
Blood draw should be 2 hours after infusion of medication
Blood draw should be 30 minutes before next dose
Fasting for 12 hours
Fasting for 12 hours, no vitamins for 24 hours
Fasting for 12 hours
Fasting for 12 hours
No gadolinium, iodine, or barium-containing contrast in the last 96 hours before blood draw
