

Michael A. Johnson, MD

My work is meaningful to me because I am able to help adults manage chronic conditions along with promoting preventive care as a means to keep people healthy and live productive lives.

I love the puzzle of solving medical problems and enjoy the long-term, meaningful relationships I develop with my patients. These relationships are based on mutual trust and respect with the patient being an equal partner in making decisions about their care.

Education

Medical Degree:

Indiana University Medical Center - Indianapolis, IN

Residency:

Indiana University Medical Center - Indianapolis, IN

Board Certification:

American Board of Internal Medicine

Professional Interests

Preventive medicine, treatment of congestive heart failure, hyperlipidemia, and renal diseases.

Personal

My wife Mary and I have two children. In my free time, I enjoy spending time with family. I have several hobbies that include running, biking, skiing, boating, and gardening.
