

As an established healthcare provider in the community, Primary Care Associates of Appleton allows me to reach many who have diabetes. My direct interaction and collaboration with the primary care providers at PCAA, along with access to greater resources, allows for optimal diabetes care to patients of all ages.

Every patient is unique, thus, I believe patient care should reflect the needs of each individual. Education and participation in decisions are key to the management of diabetes. By providing the knowledge, education and skills, as well as offering guidance and encouragement, my goal is to prevent and improve diabetes-related complications for patients.

Education

Degree:

Bachelor of Science in nursing:

University of Wisconsin-Madison School of Nursing - Madison, WI

Master of Science in nursing:

University of Milwaukee - Milwaukee, WI

Board Certification:

Advanced Diabetes Management - American Nursing Credentialing Center

Professional Interests

Type 1 and type 2 diabetes for all ages, insulin pumps, sensors, and gestational diabetes.

Personal

During my free time, I enjoy spending time with family, gardening, reading, kayaking, playing the piano, and going "up north" to our cabin.

Roxanne D. Radich, APNP, CDE
